

What do these top horse professionals have in common?
They have all discovered the power and outstanding results of Equine Mega Omega

"I was introduced to Equine Mega-Omega at the Reichert Celebration this past year when a few of our horses had quit sweating. Not only did I see the immediate results I was looking for, I was really impressed with how the overall condition of our horses had drastically improved within a few short weeks. Not only did it cure the sweating problem, any swelling they were experiencing in their legs had completely disappeared, they were holding their weight better and their hooves and hair coats seemed to have improved as well. Within sixty days of initially trying this new product I was completely sold! Now, every horse in our barn is on Equine Mega-Omega!"

"I've been training horses for 25 years and I have never had a supplement do what Equine-Mega-Omega does, from muscle tone to Anhidrosis, it is the best. In 2010 we had the Jr. Western Pleasure champion at the AQHA Congress, the AQHA World Champion, the 2yr. Old Western Pleasure and the Reserve World Champion in Jr. Western Pleasure. All of these horses were on Equine-Mega-Omega, and it really made the difference!!!!!!!"

Gil Galyean | Gil Galyean Performance Horses

"I typically have about 23 head in my barn at one time. As we all know this summer was hotter than most. I was having a hard time with some of my horses not sweating, but I got to noticing that all the ones getting the Mega Omega didn't seem to have a problem, so I thought "alright, I'll just try out a little experiment." I started giving the horses that weren't sweating the daily recommended dose of Mega Omega. Within two days I could see a big difference in the condition of those horses. Since then I've had no problems. I would recommend Mega Omega to anyone having the same issues."

Jeff Honey | Trainer

"Last year at the Reichert Celebration we were introduced to Equine Mega-Omega supplement oil due to the necessity brought forth by a non-sweating mare. Once introduced to the Mega Omega the mare started to sweat within a 24 hour period post treatment. At a later date the same mare was diagnosed with Navicular disease. Once the mare was brought back to the ranch we decided to start treating her with our Acuscope/Myoscope instruments to relieve pain and increase circulation to the affected areas. We discussed the possibility of using Equine Mega-Omega to also help with the symptoms of Navicular disease. Pete told us of the new product that was still within the trial stages that worked specifically on Navicular cases, and we decided to give it a shot. Wow! What an excellent product! Coupling the Mega Omega supplement to the treatment protocol of the Acuscope/Myoscope was the best decision we have ever made! I cannot raise enough praise to Equine Mega-Omega for giving me my horse back. Currently her symptoms have been greatly decreased, and she is being worked without any discomfort. Each day she shows increasing improvement within not only her movement, but also her spirit and attitude. Not a feeding goes by without Equine Mega-Omega. Currently we are incorporating Mega Omega into treatment protocols for other horses at our ranch, and they are showing marked improvement as well. Once again, we thank Pete and Mega Omega for the introduction of such a wonderful product!"

Heidi Mc Nair | Certified Acuscope Therapist

I have to say, when Jeff wanted to try this, I thought, here we go again. Another product I have to convince myself that it is working. Well, I tried one horse first and saw a definite change in her appetite and weight gain after one month. So I decided to try the whole barn. We are almost four weeks into it and I am very pleased. Their hair looks great, they are eating well, energy level has actually decreased and I am not having any of the muscle soreness like we've had in the past. I'm sold!"

Wendy Allen | Sweet Tomorrow Farm

"I'm sending you a note to let you know how awesome Mega Omega is. My horse would not sweat. Then, just after four doses there it was, Sweat! I can't tell you how thankful and excited I am. I'm a lifelong customer now!"

Jackie Thompson

"Since being introduced to Equine Mega Omega, I have noticed improvement in hair coats, hoof condition, joint issues and overall health of the horses. I started the supplement with my daughter's 25 year old gelding - the response was overwhelming! Now all the horses in the barn receive Equine Mega Omega. I'm extremely pleased with the results! It's the all-around supplement for the all-around horse!"

Mark Dunham, Owner/Trainer | Mark Dunham Quarter Horses

"Equine Mega-Omega is the first product on the market that I have felt strong enough about to introduce into my entire program. We have seen dramatic improvement in all our horses from non sweaters to poor hair coats. Thank you for such an outstanding product."

Robin Frid | Robin Frid Show Horses

"Being on the road so much and pushing our horses to give 100% takes a toll on the horses bodies, with the daily use of equine mega omega, our horses have maintained a great coat, and body weight while also improving their joint performance. I recommend this product to anyone"

Tate Oakley | Rusty Green Quarter Horses

"Just a line to let you know since putting Blended Chocolate on Equine-Mega-Omega I have seen a major improvement in his weight, hair coat, performance and overall health. I would recommend this product to anyone as essential element for their horse's nutrition."

Stacy Huls | Huls Performance Horses

"Thank you Equine Mega Omega! Freckles, a 10 year old paint gelding, had feet and joint problems. He is now barefoot and running around happily in the pasture. He is requiring less food reducing his feed bill and the vet has not been needed except for routine yearly exams. I would recommend this great product to anyone who owns a horse. Results will be seen in their hair coat, weight, feet, joints, and personality."

Kathy in Louisiana

"I was introduced to Equine Mega-Omega some time ago by my vet when we encountered sore muscles, particularly hamstrings and had outstanding results! Since meeting you and finding all the benefits of your product, I am completely sold. The weight maintenance, hair coats and hoof condition have improved greatly, and I also feel our joint management has been greatly affected. All my horses are now on Equine Mega-Omega. Thank you!"

Leonard Berryhill

"We wanted to let you know how impressed we are with the Equine Mega-Omega. We have a mare here at the ranch that was doing really well this summer and we started having trouble with her being back sore, tight in her ham strings and did not want to swing her hind legs. We made an appointment at the vet and the first thing they had us do is put her on the Equine Mega-Omega. Within a week we could see a huge difference, her mood changed almost instantly. She is back to being the horse we had when we got her. We will be putting all the horses on the Equine Mega-Omega."

Troy and Alicia Compton | Troy Compton Quarter Horses

"I've been feeding Equine Mega-Omega for only a couple of months and can already tell a difference in my stallion's hair coats and appetites. I really like it! I have one horse who is always lame and now he's sound....so I believe it's definitely helping with that too. I think it's a great product and anxious to use it into the busy breeding season. I look forward to be able to tell the differences in the semen count as well."

Shorty Parks

The lack of fresh green grass in your horse's diet assures it's getting too little Omega 3 and too much Omega 6. The essential fatty acids (O3s and O6s) cannot be made by your horse's body and must be fed or supplemented.

Equine Mega-Omega is a scientifically formulated, tested and patented Omega supplement that works to achieve optimum balance of Omega 3/6/9. Omega 3s, 6s, and 9 work together, each in entirely different ways, to insure the health of your horse, from every cell inside the body to every hair on the outside.
